USPA is a 501(c) (3), non-prof organization, founded in 1975 as US Radionics Congress.

SPECIAL EVENTS – FREE & FOR USPA MEMBERS IN GOOD STANDING

July 20, 2024, 1 pm - 4 pm (Central Time) A Panel of experts present “Enhancing Wellness Beyond Censorship.” Presenters include Beverly Rubik, Ellen Kamhi, Glen Rein, John Reid and Sharry Edwards

August 17, 2024 1 pm - 5 pm (Central Time) Pete Radatti presents “Using Radionics to Enhance Wellness: Toxin Removal, Immune system Balancing and More.”

These programs are being produced as a thank-you gift for the years of support of our members. A link to the event will be sent directly to all members about a week before the event.

JULY 20, 2024 - “Enhancing Wellness Beyond Censorship.”

Enhancing Wellness Beyond Censorship – Introduction by Beverly Rubik, PhD

Censorship has become a conspicuous problem of our times that is thwarting our health freedom and personal choices. For instance, the World Health Organization, government, and mainstream media maintained an authoritarian view regarding the recent Covid-19 pandemic and the experimental injections, claiming that they alone represented the “science.”

Any information that challenges their view has been censored. Brave scientists and medical practitioners who criticize the mainstream view or offered a different perspective have been suppressed and shunned. Yet more recent evidence proves that the “official” dogma is far from optimum for public health. Censorship has also impacted other major issues, such as “global climate change”.

Real science is not a closed system, but an open, ongoing endeavor by the scientific community to explore and uncover more facts. There is no final word on anything. The scientific method of open

rigorous inquiry should provide the foundation for public policy and help people make the best personal choices for their health.

In this mini-conference, we will hear from a few scientists and health practitioners who have raised critical questions and challenged the dogma. Some have been exploring novel research questions that impact basic knowledge and understanding, while others bring new wellness protocols into the clinic and our daily lives.

Schedule

Schedule of presentations

- 1:00 Scott Beutlich opening remarks
- 1:10 Beverly Rubik PhD (30 min)
- 1:40 Ellen Kamhi PhD, RN, AHN-BC, RH(AHG) (30 Min)
- 2:10 10-minute Break
- 2:20 Glen Rein PhD (30 min)
- 2:50 Sharry Edwards MEd (30 min)
- 3:20 Five-minute Break
- 3:25 Panel Open to Questions

Presenters

Beverly Rubik, PhD -Bio

Throughout her scientific career, Dr. Beverly Rubik has witnessed the stifling or suppression of novel scientific discoveries that challenged mainstream dogma, from alternative therapies to studies on parapsychology and subtle energies. Such “frontier science” remains largely outside of mainstream science.

Today humanity is suffering from an even larger problem, a global “pandemic” of disinformation and misinformation. Most information is often a mix of truth and untruth. Yet censorship, downright lies, and scientific fraud have become rampant for any information or ideas that are perceived to challenge the “official narrative.”

Our freedom of speech has been seriously curtailed. So, how can we know what is true? Dr. Rubik will delve more deeply into this enormous problem that affects all of humanity at a time when reliable information is pivotal to making informed life decisions. She will share her strategies toward discerning reliable information, as well as identifying the "red flags" where more critical questioning is appropriate.

Beverly Rubik, PhD - Presentation

Censorship and Suppression in Science

Abstract Submitted for USPA Mini-conference, July 2024

The history of science shows that there have always been novel, even anomalous, scientific claims that have challenged academic scientific orthodoxy. Thomas Kuhn maintained that scientific progress is marked by “paradigm shifts” that occur when enough new evidence accumulates that severely challenges the dominant paradigm, and this leads to a new scientific paradigm that governs science.

However, there is a major influence on science that goes beyond pure academic reason. President Eisenhower, in his departing speech, warned us of the growing power of the “military-industrial complex.” This has a powerful influence on science today, with respect to funding, career promotions, science education, and control of scientific publications. As a result, we are suffering from a global “pandemic” of disinformation and misinformation. The notion of a “Censorship-Industrial Complex” that has hijacked science will be proposed, and its methods of suppression and censorship will be outlined.

Some examples of key scientific discoveries that impact our health and wellness but that were suppressed will be given. Some strategies for how we might recover genuine science will also be discussed.

Learning objectives:

1. Explain what the scientific paradigm is, and give two examples of how it changed in the history of science.
2. What is the “military-industrial complex” as expounded by Eisenhower? How has it has changed over the years and become a dominant force influencing science?
3. What are some key scientific discoveries that impact our health, but have been suppressed or excluded from mainstream science?

Ellen Kamhi, PhD, RN, AHN-BC, RH(AHG) – Bio

Ellen Kamhi, PhD, RN, AHN-BC, RH(AHG), *The Natural Nurse*® has been a wild crafting herbalist since 1964. Dr. Kamhi attended Rutgers and Cornell Universities, sat on the Panel of Traditional Medicine at Columbia Presbyterian Medical School, is a Medical School Instructor, and teaches Botanical Pharmacology.

She is a leader in the nutraceutical industry, recognized as a consultant specializing in regulatory issues, formulation and product education. She is on the Board of Directors of the American Herbalist Guild RH(AHG), nationally board certified as a holistic nurse (AHN-BC) and on the education committee of the American Cannabis Nurses Association (ACNA). She provides CEU certified instruction for RN, NP, LMT, RD, ND in Herbal Medicine at Natural Nurse Academy.

She has co-authored several books, and cohosts Radio Shows with Dr. Eugene Zampieron, ND. Dr Kamhi received the J.G. Gallimore Award- for research into subtle energy, and developing unique Darkfield microscope techniques (1997), and for recognition for Woman of Science-distinctive research (2004).

Ellen Kamhi, PhD, RN, AHN-BC, RH(AHG) – Presentation

The Suppression of Natural Medicine

Ellen will discuss the HISTORY OF NATURAL MEDICINE with an emphasis on the **ONGOING SUPPRESSION of NATURAL MEDICINE** throughout history and ramifications in current day suppression of herbal, energetic and other natural interventions.

The Suppression of Natural Medicine is not new, but is deeply rooted in US history. Today this suppression manifests as the FDA and FTC hard-handed regulation about the sales and marketing of natural healing techniques, including herbs, homeopathics and energy medicine.

The government states that this over regulation is to support ‘SAFETY.’ However, the US spends the most per capita on healthcare and has one of the worst overall health outcomes, so something does not add up. Especially since US Health Care Ranks Last Among Wealthy Nations.

See this Chart at the end of this Newsletter:

<https://www.commonwealthfund.org/publications/infographic/2014/jun/us-health-care-ranks-last-among-wealthy-countries>

Learning Objectives:

1. Review some of the historic figures linked to the ongoing suppression of natural healthcare: Rockefeller family, Morris Fishbein, Abraham Flexnor
2. Understand how Eclectic Physicians and Naturopaths were Displaced
3. Recognize how current regulations by the FDA and FTC interferes with your right to information about the benefits of natural healing techniques

Glen Rein, PhD – Bio

Dr Glen Rein graduated from ... (US) and obtained his PhD from London University (UK).

Following the completion of his PhD, Dr Rein co-ran a laboratory at St Bartholomew's hospital (UK) continuing his in-depth research interests in bioenergetics with the summation of these new findings being published in respected domains including the prestigious journal 'Nature'

Returning to the US, Dr Rein continued his study and research in biomedical sciences at highly regarded institutes including Harvard and Stanford Medical Schools.

Dr. Rein has extensive Fortune 100 corporate experience working on innovative product development and obtaining numerous patents. He is currently CEO of the Quantum-Biology Research Lab conducting further innovative and contract research.

Most recently, Dr. Rein has co-founded Glee Biologics with Dr. Lee Lorenzen.

Glee Biologics is developing Aquaceuticals with structured water, nanoparticles and frequencies of biomolecules and pharmaceuticals in accordance with the emerging field of Informational Pharmacology. Dr Rein has authored and co-authored numerous scientific papers and published within prestigious journals.

He is on multiple Boards, has lectured in eight countries and has appeared in numerous radio, TV and documentary programs and series.

Whilst being fully professionally committed to rigorous scientific investigation, Dr Rein is known for his ability to also present often complex scientific material in ways which give the wider public the opportunity to benefit from his lifetime of focused research.

Glen Rein, PhD – Presentation

Homeopathy

The efficacy and scientific validation of homeopathy has been studied by numerous credentialled scientists in main-stream journals. One data base has 176,000 such articles.

There are also conferences and research institutes and a hospital (The Royal London Homeopathic Hospital) exclusively devoted to this subject. In some cases, homeopathic remedies have been shown to be as effective as pharmaceutical drugs.

So why don't the doctors in America and many other western hospitals use homeopathic remedies and why is homeopathy repressed? In part this is political and in part the repression is due to the resistance of the medical establishment to accept the premise of "water memory" despite the strong scientific evidence for its existence.

This talk will review the basic science behind homeopathy, water memory and imprinting water with information to educate the consumer about the efficacy of homeopathy. The review will include in-vitro experiments, animal studies and clinical outcomes.

Learning Objectives:

1. Learn how water can store memory
2. Learn some of the biological effects of homeopathic remedies
3. Learn the politics behind why homeopathy is so controversial

Sharry Edwards, MEd – Bio

Sharry Edwards has been accused of being too scientific by some, too esoteric by others. In actuality she is a bridge between both fields of inquiry. Sharry is the acknowledged pioneer in the emerging field of Vocal Profiling using Bio Acoustic Biology. She has for many years provided the leading-edge research to show the voice as a holographic representation of the body that can be used to change the face of medicine.

From birth to death, we use sounds to express our needs and emotions, but there are additional layers of information hidden within the words. In modern times we possess only limited conscious awareness of this information for ourselves or as a means to interpret the intentions of others.

Vocal Profiling has the ability to let us know the intentions of our leaders; the motivations of our partners; the foundation of our sense of well-being. Would those abilities be of value in the struggle to attain dominion over our intrinsic right to personal freedoms?

Imagine a future in which the individual frequency-based biomarkers contained within the voice can be used to keep us and our world, healthy and emotionally balanced.

Vocal Profiling software has been developed that can use the components of the voice to create a matrix of information about anyone, from fundamental DNA, to the hidden intentions of those who claim to speak for us.

Buckminster Fuller said “In order to change something, don’t struggle to change the existing model. Create a new model and make the old one obsolete.”

Sharry’s intention is to demonstrate how the present system of health by governmental tyranny is both a tragedy and an opportunity for, We The PEOPLE, to take charge of our own health using a new paradigm of SELF HEALTH.

Sharry Edwards, MEd – Presentation

The Potential of Math as Medicine

Is Frequency, as sound, light, vibration, aroma..., the basis of our Universe? We measure it, study it, quantify it and use it to understand ourselves, our environment, our biochemistry, and our behaviors. But what if frequency, defined by math, dictates, and maintains our existence?

What if Math, used to explain the basis of everything, is more than synthetic equations? What if math is organic? If so, could we be considered math-based life forms? If we could reveal the mathematical codes of our existence, could that information be used to provide optimal form and function for our planet and all its inhabitants?

In order to provide predictability and safety, the concepts of math and medicine often act conjointly to quantify, define and model, medical practice. Studies conducted by the non-profit Institute of BioAcoustic Biology & Sound Health, located in Albany, Ohio, USA, has consistently demonstrated that math can be much more than a measurement tool. The case studies they have amassed, using Math, as frequency-based BioMarkers, indicate that the solution to therapeutic predictability and resolution may be possible.

It can be demonstrated that just as there are Pathways of compounds called Chemistry; there are Mathways of subtractive frequencies, dubbed Sonistry that can be used to create numeric biomarker matrices capable, individually, and collectively, of being therapeutically predictive, diagnostic, and prescriptive.

To date, there is no conventional, universally accepted modality that has the potential to assess our biological survival or threat of pandemic annihilation, plus support long term space exploration. The Institute’s frequency-based solutions show the ability to overcome many issues previously thought to be incurable.

As is the case with the current pandemic caused health issue, by the time the cause has been properly identified, it is often too late to provide remediation. Frequency-based medicine has shown the ability to provide prompt and corrective guidance in person or via the internet. Since Dec 2019, the Institute has shared with the public, math-based solutions for the damages caused by the latest man-made plague.

Consider the brain as our central processing unit. Frequency based signals are generated and have been determined to be a communication pathway travelling along neural networks that have the ability to self-monitor and provide stasis.

Frequency can be represented in terms of mathematical equations. If math can be proven to be a form of healing, does this indicate that math may be organic or that we may just be sophisticated art forms that someone/something created using math-based algorithms.

At our core we are merely sophisticated math-based animations?

Can we be “managed” through our individual frequency-based Signatures? Can we imagine a future in which we may be individually identified, and managed by a simple remote control that is completely programmable?

Studies substantiate that the human voice can reveal data which indicates that people who share similar traumas, stress, diseases, toxicities...share similar, if not identical, vocal frequency anomalies. The essential element is accurately identifying the appropriately significant frequencies associated with each individual.

The brain communicates using the language of frequency and has the ability to reveal individual DNA/RNA templates that have the potential to promote and extend life. Over the last thirty years, vocal profiling has provided many of these answers as to how these theories can be put to use to bring the Truth to the surface about who we are, how we got here and where we are going in terms of our intentions and health.

How hard is it to believe, that our Maker created us and placed us in a Simulation that allows us to thrive or die? Dis-ease results when our programming mechanics wavers off-key.

BioAcoustic Biology has helped identify the Mathical hidden Codes of life that may add a new dimension to our existence. This work will likely be best known for its ability to bridge the gap between the innate, esoteric, and scientific realms of human existence.

Whoever understands and commands this protocol will surely have the power to control all animated life forms. Who should that be? My deepest desire is that such an endeavor should belong to the People.

Math Based life Forms. Are we Merely Sophisticated, Mathematically Programmable Animations?

Learning Objectives

1. Participants will be exposed to the proposition that the history and reality of disease may be mathematically intrinsic
2. Participants will be made aware of the evidence that optimal form and function may be managed individually and collectively through frequencies manifested as music and/or sound.
3. Participants will be introduced to the reality that health and wellbeing can be positively influenced and reversed using low frequency presentation.

John Reed, M.D. – Bio

John H. Reed, M.D. is a physician formerly associated with Johns Hopkins and the National Institutes of Health (NIH).

He is currently the president of the World Institute for Scientific Exploration (WISE), is a lifetime member of USPA, and serves on the Board of Directors of USPA.

He also serves as head of the USPA Library and Archives, whose mission is to preserve the writings and collections of all USPA conference speakers, USPA members, and non-members with an interest in the subject matter covered by USPA. He may be reached at joreed43@gmail.com

August 17, 2024 - "Using Radionics to Enhance Wellness."

**Our final "Members Only" event this year
will be August 17th, 2024
1:00 to 5:00 Central Time.**

August 17, 1 pm - 5 pm (Central Time)

Pete Radatti will present

"Using Radionics to Enhance Wellness:

Toxin Removal, Immune system Balancing and More."

Table of Contents

SPECIAL EVENTS – FREE & FOR USPA MEMBERS IN GOOD STANDING..... 1

 JULY 20, 2024, 1 PM - 4 PM (CENTRAL TIME) A PANEL OF EXPERTS PRESENT "ENHANCING WELLNESS BEYOND CENSORSHIP."
 PRESENTERS INCLUDE BEVERLY RUBIK, ELLEN KAMHI, GLEN REIN, JOHN REED AND SHARRY EDWARDS1

 AUGUST 17, 2024 1 PM - 5 PM (CENTRAL TIME) PETE RADATTI PRESENTS "USING RADIONICS TO ENHANCE WELLNESS: TOXIN
 REMOVAL, IMMUNE SYSTEM BALANCING AND MORE."1
